Gemini Project - Issues

- During May NGT received feedback that there are a number of issues around the project:
 - Consultation
 - Governance
 - Citrix
 - APIs
 - Multiple Log On
 - Enhancement requirements
 - Need to install security certificate on client PCs
 - Accessing a dynamic market using a “dummy” PC is very user-unfriendly

Gemini Project - Issues

- NGT are keen to fully understand these issues and want to discuss them further today
- Agreed issues to be managed via the Issues Log
