### Impacts of the Change?

There are no impacts to Xoserve core systems as the changes are only documentation related. UK Link was implemented with the ability to accept indexes of 12 characters (1972.7). With regards to 2024 this rejection code is already issued from UK Link but was excluded from the list. In addition, there is no cost associated with these changes for Xoserve to implement as they are only documentation related. These changes are not identifiable on the Change Register and do not have associated XRN numbers as they are not functional changes to Xoserve. All Users will need to assess whether there will be any system impacts as a result of these changes. No system changes for Xoserve. The above changes are documentation only.

XRN4770 was added following approval at the November Change Management Committee meeting.

XRN4453.1 Amendment to Job/UPD hierarchies to show 'irrelevant' datasets and Minor change to UK link Manual to reflect receipt of Service Desk contacts via Web portal were both approved to be added to February 2019 release at DSC Change Management committee meeting on 12<sup>th</sup> December 2018. Both changes being documentation only changes.

<b>DSC Service Line</b>	Only for XRN4770
<b>Will there be a downtime for the overall Release?</b>	No
<b>Where can I find more information?</b>	<a href="mailto:uklink@xoserve.com">uklink@xoserve.com</a>
