

XRN5116 - Domestic Report - Must Read Prenotification

DSG Views

Background

- The purpose of this change is to change the frequency of the 'NUR Domestic Report' to Monthly to support proactive Shipper activity around submitting reads for IGTs in line with UNC Must Read obligations, in addition to reducing MRA activity for IGTs.
- The current must read processes have an impact on the IGT SSPs, however the current Pre-notification Domestic Report is only issued on a quarterly basis, so Shippers are unaware of impacts on a quarterly basis. This meant Shippers do not have the necessary information often enough to support proactive activity of submitting reads to IGTs.
- There is no intention to change the format of the report, only the frequency

DSG Views

- We are asking DSG attendees to inform us if this will have any material impact on your systems or processes.
