

DES CSSC Changes

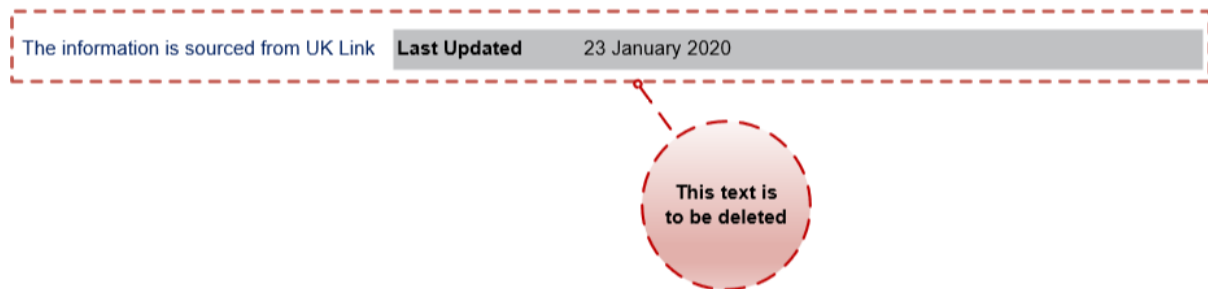

This document outlines the changes being implemented in the new DES system that differ from the existing production DES system. This is for the purpose of identifying what needs to be masked if the new DES system is implemented prior to CSS going live.

Home Screen

The message that currently appears on the home screen informing the user when the data was last updated will no longer be displayed. This message is currently displayed as the data in the production system is pulled from SAP BW which refreshes from SAP ISU each night. This results in the data in DES being at least a day behind. As the new system will pull the data directly from SAP ISU it will be updated in real time with no overall refresh date.

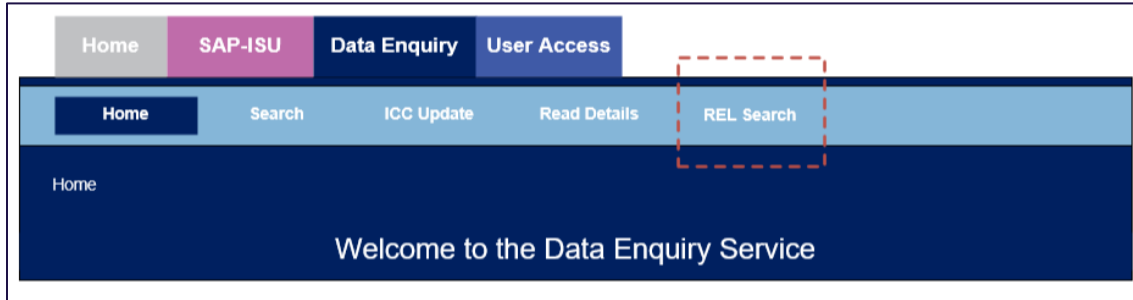

The Data Enquiry Service provides you with the ability to view supply meter point data that you and your organisation are permitted to access. By accepting the Terms and Conditions applying to your use of the service you acknowledge that you will only access the service for the purposes for which you and your organisation have been provisioned.

This message is no longer relevant even if the new DES system is implemented prior to CSS going live and can be removed.

Function Bar

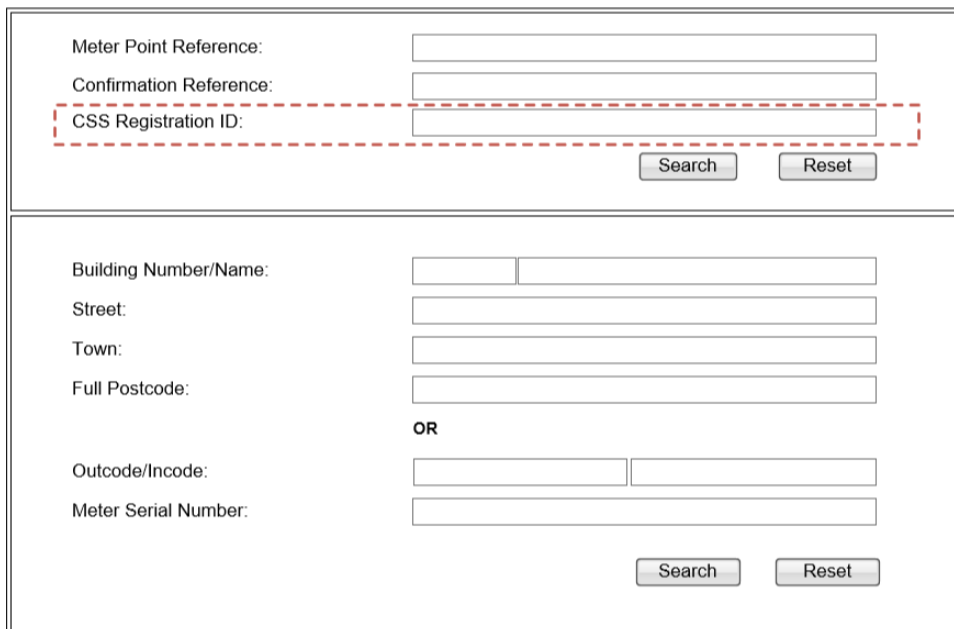

The REL Search function has been added to the Function Bar and is only available to Shipper, Supplier, ICC (MEU) and Xoserve Users.

This will need to be masked for all users if the new DES system is implemented prior to CSS going live to prevent access to the REL Search function until it is available.

Meter Point Search Screen

The ability to perform a Meter Point Search via CSS Registration ID has been added to the Meter Point Search Screen

The screenshot shows a form with two sections. The top section has three input fields: 'Meter Point Reference:', 'Confirmation Reference:', and 'CSS Registration ID:'. The 'CSS Registration ID:' field is highlighted with a red dashed box. Below these fields are 'Search' and 'Reset' buttons. The bottom section has several input fields: 'Building Number/Name:', 'Street:', 'Town:', 'Full Postcode:', 'Outcode/Incode:', and 'Meter Serial Number:'. There is an 'OR' label between the 'Full Postcode:' and 'Outcode/Incode:' fields. Below these fields are 'Search' and 'Reset' buttons.

This will need to be masked for all users if the new DES system is implemented prior to CSS going live.

Meter Point Search – Results Screen

RMP Status field has been added to the data table.

Search Results for:

MPRN	LSP	Address	Postcode	SMP Status	RMP Status	MSN	Network Name	Network Short Code

This field will need to be masked for all users if the new DES system is implemented prior to CSS going live.

Meter Point Search – Details Screen (Portfolio & Community View)

RMP Status Field

RMP Status field has been added to the general meter point information data table at the top of the page.

MPRN	LSP	Address	Postcode	SMP Status	RMP Status	MSN	Network Name	Network Short Code

Meter Point Information	Meter Asset Data	Daily Read Equipment Data	Converter Asset Data	
Manufacturer	Correction Factor			
Model	Gas Act Owner			
Meter Type	MAM Short Code			
Year of Manufacture	MAM EFD			
Fitted Date	SMSO ID			
Device Status	SMS Operating Entity EFD			
Number of Dials	DCC Service Flag			
Units	DCC Service Flag EFD			
Imperial Indicator	Installing Supplier ID			
Meter Mechanism	First SMETS Installation Date			
Meter Capacity	IHD Install Status			
Location	MAP ID			
Meter Asset History	Meter Read History			
Meter Read Date	Meter Read Type	Meter Read	Converter Read	Converter Round the Clock

This field will need to be masked from view for all users in both Portfolio View and Community View if the new DES system is implemented prior to CSS going live.

Meter Point Search – Details Screen (Portfolio & Community View) Cont.

CSS Switching Data Tab

The CSS Switching Data tab has been added to the both the Portfolio View and Community View screens

Portfolio View:

MPRN	LSP	Address	Postcode	SMP Status	RMP Status	MSN	Network Name	Network Short Code

Current Registration	Incoming Registration
CSS Registration ID	CSS Registration ID
Registration Status	Registration Status
Registration Status From Date	Registration Status From Date
Registration Active Date	Supply Start Date
Registration Inactive Date	Registration Inactive Date
Domestic Premises ID	Domestic Premises ID
Supplier Market Participant ID	Supplier Market Participant ID
Shipper From Date	Shipper From Date
Shipper Market Participant ID	Shipper Market Participant ID

This tab will need to be masked from view for all users if the new DES system is implemented prior to CSS going live.

Community View:

MPRN	LSP	Address	Postcode	SMP Status	RMP Status	MSN	Network Name	Network Short Code

Current Registration	Incoming Registration
CSS Registration ID	CSS Registration ID
Registration Status	Registration Status
Registration Status From Date	Registration Status From Date
Registration Active Date	Supply Start Date
Registration Inactive Date	Registration Inactive Date
Domestic Premises ID	Domestic Premises ID
Supplier Market Participant ID	Supplier Market Participant ID
Shipper From Date	Shipper From Date
Shipper Market Participant ID	Shipper Market Participant ID

This tab will need to be masked from view for all users if the new DES system is implemented prior to CSS going live.

Meter Point Search Details Screen (Community View)

The existing data items that are displayed on the Community View screen have now been placed under a tab titled Meter Point Information.

MPRN	LSP	Address	Postcode	SMP Status	RMP Status	MSN	Network Name	Network Short Code

Meter Point Information

CSS Switching Data

Interruption Contract Exists	N	UPRN	
Meter Type	Turbine	SMSO ID	
Meter Capacity	2500	SMS Operating Entity EFD	
Market Sector Code	I	DCC Service Flag	
Number of Dials	8	DCC Service Flag EFD	
Imperial Indicator	N	Installing Supplier ID	
Meter Mechanism	Credit	First SMETS Installation Date	
Withdrawal Status	N	IHD Install Status	
LDZ ID	SW	Seasonal Large Supply Point Indicator	N
Network Owner EFD	01 May 2005	Twin Stream Site Indicator	N
Network Exit Agreement Indicator	N	CSEP ID	
Network Project Name		ASP Name	NTG
Network Indicator		Network Designation Flag	Y
Network Project Start Date			
Network Project End Date			

Supplier Details: I have read and accepted the Terms and Conditions to view Supplier Details.

This tab will need to be masked from view for all users if the new DES system is implemented prior to CSS going live.
