

Objective

Building on the Future Billing Methodology project, **RTSM** aims to:

*‘Develop and demonstrate an **integrated and flexible solution** that enables the characterisation, settlement and billing processes of a **multi-energy grid with variable CV** across the LDZ and the whole gas network.’*

Execution Plan

Engagement

Virtual
Sessions
Xoserve-SGN

Methodology Development
 Modelling Solutions
 Feasibility Study + Roadmap
 Rollout Strategy for demonstration
 Dissemination

Front-End Engineering Design

CDSP: Digital twin system or isolating
 an existing LDZ
 Design, Cost and Risks
 Execution strategy

Demonstration
 Test the new RTSM and
 make any necessary
 amendments
