Minor Release Circular

Change Reference Number: XRN4699

Date of Issue	1st November 2018
Date of Release	24th November 2018

What changes are delivered by the release and how will the changes affect me?
Please write the change reference number, title and attach the documentation for each change in the table below.

CDSP Reference	Title	DSC Service Area	Webpage Link
XRN4576	Class 4 Transfer Reads not Visible to Shippers in DES	Service Area 22: Specific Services	https://www.xoserve.com/index.php/future-releases/
XRN4612	RGMA Activity on Transfer Date	Service Area 5: Metered Volume and Metered Quantity	https://www.xoserve.com/index.php/future-releases/

Impacts of the Release?

XRN4576: will introduce a new read screen into the DES Portal which will enable Shippers to view corresponding read history/details as well as missing Transfer reads and additional detail such as read reason and timestamps within their portfolio view.
As a result of this change there will be no impact to existing setup or Web services.

XRN4612: This relates to Defect 655. Since Project Nexus implementation, Xoserve has had a workaround in place to ensure that missing reading data is provided to individual Shippers via email. This change is being delivered to ensure that Xoserve meets its obligations to notify both outgoing and incoming Shippers of the closing and opening reads via the .URN (Read Notification) file. Delivery of this change will see this workaround cease, and activity to return to the expected performance.

DSC Service Areas	See above
Will there be a downtime for the overall Release?	No.
Where can I find more information?	Change Pack Comm Reference 2102.6 – RJ - ES
