Update

Note: For 'Allocate as Nominate' meters Requested Energy = Nominated Quantity, Scheduled Energy = Confirmed Quantity

3. The user navigates to the Update Nomination screen:

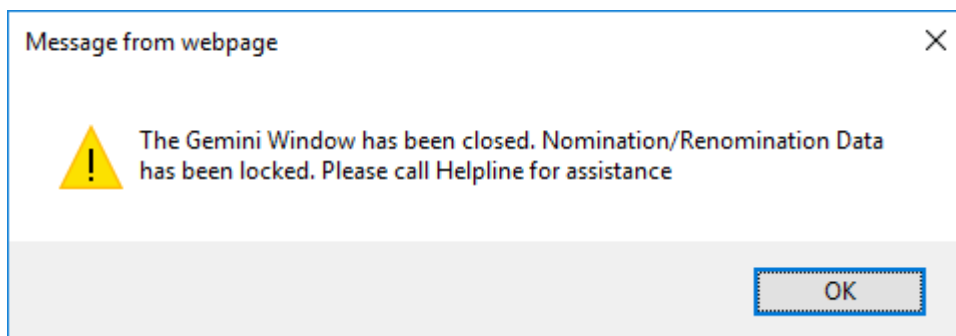

The screenshot shows the 'Update Nominations' screen in the GEMINI web application. The browser title is 'Update Nominations - Internet Explorer'. The page features a navigation menu with tabs for Contract, Product, Deal, Meter Details, Nominations (selected), OCM, Measurements, Allocations, and Invoice. A banner at the top right says 'Smell Gas? Call free on 0800 111 999'. Below the navigation, there are fields for Messages (58366), User Name, BA, and User Role. The breadcrumb trail is 'Home > Nominations > Nominations > Update'. The main content area is titled 'Update Nominations' and includes a sub-header with BA, Rate Schedule (Entry), and Service Id. Below this, there are fields for Eff Start Date (22-Mar-2018), Eff End Date (22-Mar-2018), and Update By (ALL). A search section has a dropdown for 'Search: --Select--' and a 'By:' field. The main table has columns: Activity, Special Function, Meter Id, Calorific Value, Volume (Mcm), Req Energy(kWh), Status, and Reason. The table is currently empty, with a 'Total' row at the bottom showing a value of 0. At the bottom right, there are buttons for Save, Cancel, Verify, and Next>.

4. The user closes the Nomination screen directly without clicking on cancel, which keeps the current session open.

- When the user does this the application displays a pop up warning message and if the user ignores and proceeds, the data will get locked.

- User can see the below pop up message to show that the data is locked

7. When the user wants to update the Nomination they will experience the below screen shot as the previous session is still open and locked.

Scenario 3

The user's 'update screen' is still open when the Gemini Maintenance window starts.

Once the server is up and the user tries to access the same Nomination they will experience the Nomination lock.

1. The user tries to update the nomination data

2. The system goes down for daily Maintenance and the user was still placing their Nomination.

The screenshot shows the 'Nominations' page in the GEMINI system. At the top, there is a navigation menu with tabs for Contract, Product, Deal, Meter Details, Nominations (selected), OCM, Measurements, Allocations, and Invoice. Below the menu, there are fields for Messages (58386), User Name, BA, and User Role. The main content area is titled 'Nominations' and contains a search form with fields for BA, Rate Schedule (set to 'Early'), Service Id, Eff Start Date (22-Mar-2018), Eff End Date (31-Mar-2018), View By (set to 'ALL'), and Requested Status. There are buttons for 'Query', 'Generate Report', 'Bulk Download', and 'Clear'. A note at the bottom states: 'Note: For 'Allocate as Nominate' meters Requested Energy = Nominated Quantity; Scheduled Energy = Confirmed Quantity'. An 'Update' button is located at the bottom right of the main content area.

The screenshot shows the 'Update Nominations' page in the GEMINI system, which has been replaced by an error message. The navigation menu is the same as in the previous screenshot. Below the menu, there are fields for Service, User Name, BA, and User Role. The main content area displays a large error message: 'Service Temporarily Unavailable'. Below this message, a smaller text reads: 'The server is temporarily unable to service your request due to maintenance downtime or capacity problems. Please try again later.'

3. Once the user tries to update the data, they will experience the Nomination lock.
