# UKLink Release 3 Track 2 XRN4454 - DN Sales Requirements for UKLink Enduring Solution

## **1.1 Introduction and Purpose of Document**

- Following UK Link Implementation in 2017, additional requirements have been agreed with the industry which are applied in scheduled releases.
- This pack will provide you with an overview of Release 3 Track 2 change due to go live in February 2019.
- More information can be found on Xoserve.com <u>here</u>.
- This pack outlines change XRN4454 DN Sales Requirements for UKLink Enduring solution; which is to implement the enduring solution for the separation of Cadent Distribution Network and National Grid Transmission.

## **1.2 Overview of Change**

### Why is this change being implemented?

UNC Modification 0592S - Separation of National Grid Transmission and Distribution owned Networks - Transitional invoicing arrangements implemented for the transfer of National Grid's gas distribution business from National Grid Gas plc (NGG). Change XRN 4454 is implementing the enduring solution for the network separation.

#### Change Deliverable

National Grid Transmission will be set up as an organisation to act independently for all processes, sites configuration and flows. TGT Cadent will operate as per any other Distribution Network.

### Who is impacted by the change?

Shippers, Distribution Network, National Grid Transmission, DMSPs, MAMs will all be impacted in some way over a variety of processes.

#### What systems are impacted?

The entire suite of UKLink systems are impacted in some way.

### 2.1 UK Link updates

As part of the Change, UK Link will be updated to ensure relevant network for the site is configured.

Alongside this ,there is a change to the invoicing process. Reversal and Rebill, which applies to invoices including Commodity, Capacity, Amendments and Meter Assets Invoices will cease.

The XOSERVE COMPREHENSIVE INVOICES AND CHARGE TYPES spreadsheets should be referred to for the mapping of Charges to organisations breakdown and can be found on Xoserve.com and searching for Charge.

An example spreadsheet shows (on the classification Column) NTS, LDZ or Both

NTS charges will be issued on behalf of National Grid and the LDZ charges on behalf of Cadent distribution.

For more information of the different invoices please see the introduction to invoicing guide located here.

## 2.2 UKLink Suite updates

NTS & TGT have the relevant access and will be able to see data applicable for their organisation.

Relevant network for the site will be configured.

| Contact Residenteet   |  | Thefue: FWD8  | Questa                                   | ANOLINE .    |

| Dependent Locality<br>Post Town<br>Postcode   | LEICENTER  | Access Line of  |  | Actust Holor |

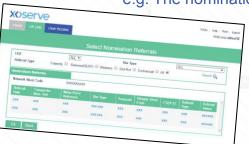

This change will also impact the Meter Read Agencies (MRA) The Relevant MRAs need to process Must Reads (MUR) for relevant organisation and will be required to access the MPRs under their portfolio.

### DES

The Data Enquiry System National Grid Transmission will be created as a user and will have access to all DES functionality for their sites

### P cutal NTS & TGT have the relevant access and will be able to see data applicable for their organisation.

e.g. The nominationand confirmation processes remains the same but

referrals will be sent to the relevant network.

National Grid could also apply a sanction to prevent a shipper taking on further NTS sites.

### Genini

National Grid Transmission and Distribution Networks will be treated independently and access will be configured accordingly

## **2.3 Other Configurations and Routings**

On the surface the change appears to have little impact on processes. This is due to large amount of work undertaken to ensure all channels of communication are configured accordingly.

All data communication sent to National Grid Transmission and Distribution Networks have all been configured, renamed if required and routed accordingly, ensuring that the data contained within remains relevant and issued on behalf of the correct organisation.

These changes have extended to

- Reports including BW
- Templates
- File formats
- IX Network & EFT File Transfer Channels

## **2.4a Shipper Impacts**

With the introduction of the new Transmission Operator short code NTS shippers need to be aware that this will now appear on : Reports including BW

Templates

File formats

The second change will the cessation of the reverse and rebill Process for Commodity, Capacity, Amendments and Meter Assets Invoices. An example of how this is shown below.

Example of how this change affects invoices

Using Commodity as an example.

## **2.4b Shipper Impacts**

### Reversal and rebill example

Distrib

- After the introduction of Network separation and prior to this change the Reverse and rebill process was introduced to split the charges to the relevant network.
- The NCO NTS EXIT COMMODITY CHARGE, and 892 CSEPS- NTS EXIT COMM CHARGE are examples of charges invoiced on behalf of National Grid Transmission (NTS) whilst the ZCO LDZ COMMODITY CHARGE are invoiced on behalf of the Distribution Network Operator (DNO). including Cadent.

After invoice creation the NTS charges are reversed and the rebilled separately

|   | invoices with              |
