Document Purpose

This document is intended to provide a single view of a change as it moves through the change journey. The document is constructed in a way that enables each section to build upon the details entered in the preceding section. The level of detail is built up in an incremental manner as the project progresses.

The template is aligned to the Change Management Procedures, as defined in the CDSP Service Document. The template is designed to remove the need for duplication of information. Where information is required in one section but has been previously captured in a previous section, the previous section will be referenced.

The summary table on the front page shows the history and the current status of the Change Proposal.

Full title of related UNC Mod	N/A
Benefits of change	Ensures compliance with UNC G3 (MOD425 installations) and G7.3.7, asset installations on first registration.
Required Change Implementation Date	June 2018
Please provide an assessment of the priority of this change from the perspective of the industry.	□ High □ Low Rationale for assessment: Should there be a delay to issuing of metering information, this could lead incorrect information being held on central systems. Providing all industry systems are maintained this change is not a priority, but given maintenance of industry data is a priority this change should not of low priority. Therefore, we have deemed the proposal to be medium priority and should be introduced as soon as reasonably possible.

Section 3: ROM Request Acceptance

Is there sufficient detail within the ROM Request to enable a ROM Analysis to be produced?	□Yes □No
If no, please define the additional details that are required.	

If the ROM Request is not accepted. Please forward this document to the Portfolio Office for onward transmission to the Change Management Committee

Section 4: ROM Analysis

This ROM is Xoserve's response to the above Evaluation Service Request. The response is intended to support customer involvement in the development of industry changes.

Should the request obtain approval for continuance then a Change Proposal must be raised for any further analysis / development.

Disclaimer:

This ROM Analysis has been prepared in good faith by Xoserve Limited but by its very nature is only able to contain indicative information and estimates (including without limitation those of time, resource and cost) based on the circumstances known to Xoserve at the time of its preparation. Xoserve accordingly makes no representations of accuracy or completeness and any representations as may be implied are expressly excluded (except always for fraudulent misrepresentation).

Where Xoserve becomes aware of any inaccuracies or omissions in, or updates required to, this Report it shall notify the Network Operators' Representative as soon as reasonably practicable but Xoserve shall have no liability in respect of any such inaccuracy or omission and any such liability as may be implied by law or otherwise is expressly excluded.

This Report does not, and is not intended to; create any contractual or other legal obligation on Xoserve.

ROM Analysis

Change Assessment

High level indicative assessment of the change on the CDSP service description, on UKLink and any alternative options if applicable

Change Impact:

Initial assessment of whether the service change is / would have:

- a restricted class change,
- · a priority service change
- an adverse impact on any customer classes

Change Costs (implementation):

An approximate estimate of the costs (or range of costs) where options are identified

Change Costs (on-going):

The approximate estimate of the impact of the service change on service charges

Timescales:

Details of timescale for the change i.e. 3months etc.

Details of when Xoserve could start this change i.e. the earliest is release X.

Assumptions:

Any key assumptions that have been made by Xoserve when providing the cost and or timescale

Dependencies:

Any material dependencies of the implementation on any other service changes

Constraints:

Any key constraints that are expected to impact the delivery of the service change

Appendix One: Glossary

efinition
Service Change has or would have an Adverse Impact on Customers of a particular
ustomer Class if:
) Implementing the Service Change would involve a modification of UK Link which
ould conflict with the provision of existing Services for which such Customer Class is a
elevant Customer Class;
) the Service Change would involve the CDSP disclosing Confidential Information
lating to such Customers to Customers of another Customer Class or to Third Parties;
Implementing the Service Change would conflict to a material extent with the
plementation of another Service Change (for which such Customer Class is a
elevant Customer Class) with an earlier Proposal Date and which remains Current,
lless the Service Change is a Priority Service Change which (under the Priority
inciples) takes priority over the other Proposed Service Change; or
) Implementing the Service Change would have an Adverse Interface Impact for such
ustomers.
service provided under the DSC to Customers or Customers of a Customer Class on
uniform basis.
Service Change which is not a Priority Service Change
M 15 1 0 1 0 1
Modification Service Change;
Service Change in respect of a Service which allows or facilitates compliance by a ustomer or Customers with Law or with any document designated for the purposes of
ection 173 of the Energy Act 2004 (including any such Law or document or change
ereto which has been announced but not yet made).
Customer Class is a Relevant Customer Class in relation to a Service or a Service
nange where Service Charges made or to be made in respect of such Service, or the
ervice subject to such Service Change, are or will be payable by Customers of that
ustomer Class
here, in relation to a Service Change, not all Customer Classes are Relevant
ustomer Classes, the Service Change is a Restricted Class Change ;
change to a Service provided under the DSC (not being an Additional Service),
cluding:
the addition of a new Service or removal of an existing Service; and
in the case of an existing Service, a change in any feature of the Service specified in
e CDSP Service Description, and any related change to the CDSP Service Description
service (other than Additional Services) available under the DSC to all Customer or
ustomers of a Customer Class but provided to a particular Customer only upon the
solomore of a Gasterner Glace but provided to a particular Gasterner only aport the

Appendix Two: Consultation Responses

As per the request at the Change Management Committee meeting on the 13th December 2017 this change was issued for consultation across the industry. The consultation closed on the 28th December 2017. The comments received will form the basis of discussion at the Change Management Committee on 10th January 2018 to approve or reject the change.

The following two comments were received:

User	Name	Date	User Comments
EDF Energy	Elly Laurence	22/12/17	We are uncomfortable with the proposal around Meter Asset Installation Date. This feels like a proposal that is linked to Retrospective Asset style updates and until there is a firm decision around the Retro Asset process going forward we would suggest this type of change should not be considered as it would compromise some of that logic.
Scottish Power	Shane Preston	27/12/17	We support to this change to ensure compliance and accuracy.
NPower	Maitrayee Bhowmick- Jewkes	28/12/17	This change is to allow submission and acceptance of RGMA flows in the 2 days between TRF (CO) and actual SSD (LI) and we have no real issue with it. However, seeing that the current process seems to be working without any problems, we don't see why we would want to change how things are at the moment.
