

Extraordinary DSG Meeting CSS Consequential Change

10th July 2020

Agenda

- Welcome and introductions
- Overview of requested change to the T88 (BRN CANCELLATION RESPONSE) record format
- Clarification on how MAM data is populated across the BRR, ASN and TMC files
- CSS Registration Secured Active Synchronisation message design issue
- Switching Programme Data Cleansing Update
- Data Enquiry / Portal Update
- AOB

Proposed Change to the T88 Record Format

Proposed Change to the T88 Record Format

- A request has been received to include Supplier information within the new T88 record which is issued in the BRR file in response to a BRN cancellation request.
- The request is to add SUPPLIER_ORGANISATION_ID into the T88 record in the same way as it is included with the T93 BRN Acceptance Notification

SUPPLIER_ORGANISATION_ID	M	N	10	0	Organisation identifier for the Supplier.
--------------------------	---	---	----	---	---

- Feedback required as to whether this change should progress, with a change pack being issued for approval.

MAM Data Population Across the BRR, ASN and TMC Files

MAM data Population Across the BRR, ASN and TMC Files

File	Record	METER_ASSET_MANAGER	CURRENT_METER_ASSET_MANAGER	PROSPECTIVE_METER_ASSET_MANAGER
BRR	T93	Playback of details provided in the BRN T90/T91 record	N/A	N/A
	K12	N/A	Details of the MAM currently recorded against the Supply Meter Point for the current Shipper Confirmation	Details of a prospective MAM that is currently planned to become effective for on a future date that has been requested by the current registered Shipper
ASN	T99	Confirmation of the association of the MAM details in the BRN to the pending CSS registration	N/A	N/A
	K12	N/A	Details of the MAM currently recorded against the Supply Meter Point for the current Shipper Confirmation	Details of a prospective MAM that is currently planned to become effective for on a future date that has been requested by the current registered Shipper
TMC	K12	N/A	Details of the MAM currently recorded against the Supply Meter Point for the current Shipper Confirmation	Confirmation that the associated MAM details provided in the BRN that will be applied to the pending registration on the effective date. If no details provided or associated (as per the ASN) then this field be will blank.

CSS Registration Secured Active Synchronisation Message Processing

CSS Registration Secured Active Synch Message

- BRD feedback was received regarding how UK Link will be handling a CSS secured active registration synchronisation message when a pending registration message has not been received in advance, which would lead to an error being generated within UK Link.
- As the Secured Active message dataset does not provide UK Link with any information regarding who the incoming shipper or supplier is UK Link is unable to process the CSS message where a Pending Registration notification has not been received.

RegistrationSecuredActiveSynchronisation – From CSS to UK Link

Data:

```
{  
    "mpxn": "string", --*  
    "fuelType": "string", --*  
    "registrationId": "string", --*  
    "registrationStatus": "string", --*  
    "registrationStatusFromDate": "string", --*  
    "registrationActiveDate": "string" --*  
}
```

- A Switching Programme design issue has been raised (DI-1177) has been raised on the back of the feedback received to obtain clarification on the controls that exist within CSS to prevent the issue from occurring.

Data Cleansing Update
