

# **Extraordinary DSG Meeting CSS Consequential Change**

24<sup>th</sup> January 2020

# Agenda

- Welcome and introductions
- Overview of DES changes
- New API formats
- Xoserve Code of Connections Document
- Meter Read Update
- UNC Update
- Shared Supply Meter Points
- CSO and Supply License Exempt Sites
- Updated on ECO process Change Request
- Change of Market Sector Code Notifications
- Data Cleansing Update
- AOB

# Overview of Data Enquiry Service Changes

# DES Change Overview

- New search field – CSS Registration ID added to existing Search screen
- New data items added to the existing screens
  - RMP Status to Search Results and Search Details screen
  - MAP ID to Meter Asset Data tab on Search Details screen
- New tab – CSS Switching Data added to existing Search Details screen
- New menu item ‘REL Search’ added to DES Home screen
- New screens introduced for REL Search
  - REL Search screen
  - REL Search Results screen – to display multiple result set
  - REL Details screen – to display detail of single MPRN
- Data Permissions modified for existing emergency contacts displayed on DES

# New search field – Existing Search Screen

**Search (Modified)**

Meter Point Reference:

Confirmation Reference:

**CSS Registration ID:**

Building Number/Name:

Street:

Town:

Full Postcode:

**OR**

Outcode/Incode:

Meter Serial Number:

# New data items – Existing Search Details Screen

**Search Details (Modified)**

MPRN	LSP	Address	Postcode	SMP Status	RMP Status	MSN	Network Name	Network Short Code

Meter Point Information | **Meter Asset Data** | Daily Read Equipment Data | Convertor Asset Data

Manufacturer	Correction Factor
Model	Gas Act Owner
Meter Type	MAM Short Code
Year of Manufacture	MAM EFD
Fitted Date	SMSO ID
Device Status	SMS Operating Entity EFD
Number of Dials	DCC Service Flag
Units	DCC Service Flag EFD
Imperial Indicator	Installing Supplier ID
Meter Mechanism	First SMETS Installation Date
Meter Capacity	IHD Install Status
Location	MAP ID

Meter Asset History | **Meter Read History**

Meter Read Date	Meter Read Type	Meter Read	Convertor Read	Convertor Round the Clock

# New Tab – Existing Search Details Screen

## CSS Switching Data (New Tab on Search Details Screen)

MPRN	LSP	Address	Postcode	SMP Status	RMP Status	MSN	Network Name	Network Short Code

[Meter Point Information](#) |
 [Meter Asset Data](#) |
 [Daily Read Equipment Data](#) |
 [Convertor Asset Data](#) |
 **[CSS Switching Data](#)**

Current Registration	Incoming Registration
CSS Registration ID	CSS Registration ID
Registration Status	Registration Status
Registration Status From Date	Registration Status From Date
Registration Active Date	Supply Start Date
Registration Inactive Date	Registration Inactive Date
Domestic Premises ID	Domestic Premises ID
Supplier Market Participant ID	Supplier Market Participant ID
Shipper From Date	Shipper From Date
Shipper Market Participant ID	Shipper Market Participant ID

- The Current and Incoming Registration sections will be populated with data provided by CSS.
- The Current Registration section will always display current registration details as it progressed from Active to SecuredInactive status. The details will not appear once the registration moves to Inactive status.
- The Current Registration section will only be populated with CSS Registration ID value that has been provided as part of CSS initial data migration. No new data will be populated until a switch is attempted or completed post CSS implementation.
- The Incoming Registration section will always display incoming registration details as it progresses from Pending to SecuredActive or Cancelled. Once the registration moves into Active status then the details will appear under Current Registration section.
- An incoming registration when cancelled will appear under Incoming Registration section until a new switch is attempted, which will replace the cancelled registration details becoming the new incoming registration.

# New Menu Item – Existing Home Screen

## Home Screen – REL Search (New Menu)

The screenshot displays a web interface for the Data Enquiry Service. At the top, there is a navigation bar with four items: 'Home' (grey), 'SAP-ISU' (pink), 'Data Enquiry' (dark blue), and 'User Access' (blue). Below this is a secondary navigation bar with five items: 'Home' (dark blue), 'Search' (light blue), 'ICC Update' (light blue), 'Read Details' (light blue), and 'REL Search' (light blue). The 'REL Search' item is highlighted with a red dashed box. Below the navigation bars is a dark blue banner with the text 'Home' and 'Welcome to the Data Enquiry Service'. Underneath the banner is a paragraph of text: 'The Data Enquiry Service provides you with the ability to view supply meter point data that you and your organisation are permitted to access. By accepting the Terms and Conditions applying to your use of the service you acknowledge that you will only access the service for the purposes for which you are your organisation have been provisioned.' At the bottom of the page, there is a grey box containing the text 'The information is sourced from UK Link Last Updated 23 January 2020'. This box is also enclosed in a red dashed border. A red dashed circle with a line pointing to the box contains the text 'This text is proposed to be deleted'.

Home

Welcome to the Data Enquiry Service

The Data Enquiry Service provides you with the ability to view supply meter point data that you and your organisation are permitted to access. By accepting the Terms and Conditions applying to your use of the service you acknowledge that you will only access the service for the purposes for which you are your organisation have been provisioned.

The information is sourced from UK Link Last Updated 23 January 2020

This text is proposed to be deleted

# New Screen – REL Search

## REL Search (New)

Meter Point Reference: 	<input type="text"/>
Confirmation Reference: 	<input type="text"/>
CSS Registration ID: 	<input type="text"/>

---

Building Number/Name: 	<input type="text"/>	<input type="text"/>
Street:	<input type="text"/>	
Town:	<input type="text"/>	
Full Postcode: 	<input type="text"/>	
OR		
Outcode/Incode: 	<input type="text"/>	<input type="text"/>
Meter Serial Number: 	<input type="text"/>	
UPRN: 	<input type="text"/>	

Access to REL data is provided solely for the purpose of enabling switching. Please tick here to confirm you understand you are not permitted to use the data for any other purpose

- This screen can be used to search with either the MPL address or REL address and the search will be case insensitive
- The User will have to agree to REL usage limitation by placing a tick against it to enable the search to progress. However, once a tick is placed, it will stay active until the User session expires or logs out or clears it manually.
- The input fields Building Number, Building Name, Street and Town will have an ability to accept Welsh character set (in addition to English character set) and perform a search based on input Welsh characters.
- The UPRN field refers to CSS supplied UPRN. A User can input only UPRN to perform a valid search.
- The valid REL search combinations for hierarchy 2 fields is same as those of existing Search screen.

# New Screen – REL Search Results

**REL Search Results (New)**

**Search Results for:**

MPRN	MPL Address	MPL Postcode	MSN
REL Address			REL Postcode
MPRN	MPL Address	MPL Postcode	MSN
REL Address			REL Postcode

- A valid REL search leading to multiple MPRNs will display the resultant record set within the REL Search Results screen.
- The REL address and REL Postcode fields will display as blank if there is no data REL data available to be displayed.
- MPL address is combination of following field –Sub Building Name, Building Name, Building Number, DPA (displayed within parenthesis), Dependent Street, Principal Street, Dependent Locality, Post Town and Town with comma as a field separator
- The REL addresses are displayed in sort order of its logical status i.e. Approved, Provisional, Delivery, Delivery Welsh, Alternative and Historic
- REL address is combination of fields – Primary Name, Secondary Name, Street1, Street2, Locality1, Locality2 and Town with comma as a field separator
- The input fields Building Number, Building Name, Street and Town will have an ability to display Welsh character set (in addition to English character set).

# Business Requirement Document

## Business Requirements Document

### Ofgem Switching Programme Data Enquiry Service Consequential Change Requirements Overview

Author (for this version):	Xoserve
Version:	0.1
Status:	Initial Draft
Date:	17 <sup>th</sup> January 2020

*This document contains confidential or privileged information; it should not be copied or disclosed to any third party without the express permission of Xoserve Ltd. All rights reserved.*

**Xoserve**

- A new Business Requirements Document for Data Enquiry Services changes has been produced.
- This is available on website:  
<https://www.xoserve.com/change/switching-programme/>

# xserve

## **New API Formats**

# Scope

- Xoserve will be providing the following API as part of the rollout for CSS
  - Query APIs
  - Data submission API
  - Outbound 'Callback' API
  - Callback Registration API

# Query API

- Supply Point Enquiry
  - An alternate to existing file interface
    - NOM (S47, S68) / NMR (S59, S70, S75, S98, Q51)
- Supply Point Switching API
  - REL data to be added to existing API service
- Transportation Rates API
  - New interface
- REL Data Enquiry API
  - New interface for Network to access REL
- MAP ID Enquiry API
  - New interface

# Settlement Data submission API

- Settlement Data API

An alternate to the new CSS BRN file interface

- RRN provided Settlement Data API

*For submitting Settlement Data where NOM/RRN was also submitted*

- equivalent to a BRN file with a T90 Segment

- RRN absent Settlement Data API

*For submitting Settlement Data where a NOM/RRN was not submitted*

- equivalent to a BRN file with a T91 Segment

- BRN Cancellation API

- equivalent to a BRN file with a T87 Segment

# Outbound 'Callback' API

- Settlement Data Response API
  - BRN Accepted
    - T93
  - BRN Error Response where RRN absent
    - T94
  - BRN Error Response where RRN provided
    - T95
  - Association data
    - An alternate to the new CSS ASN file interface*
    - T99, S66, S70
  - TMC Response
    - An alternate to the new CSS TMC file interface*
    - S15, S66, S70, N90, U06 (Transfer of ownership)
    - S88, K13 (Ceased responsibility)

# Query API Specification

- This section describes the structure of the 5 query API for the following:
  - Inputs
    - A description of the input parameters for an enquiry
  - Outputs
    - Details the output of an enquiry
  - Error Responses
    - Details the error responses

# Query API Specification

## Input Data

- Inputs:
- Header
  - "APIKey ": "string", --\*
- Query parameters will be provided in the URL
  - /api/v1.0/path\_to\_service?[query\_parameters]
    - the following example shows the URL for the Enquiry API  
`/api/v1.0/supply-point-nomination-enquiry?postcode=ABC3 4ZZ&house_no=12`

# Query API Specification

## Output Data

- Outputs: Output data in Json format will be returned

```
"mprn": [{  
    "mprn": "string",  
    "installation_number": "string",  
    "network_name": "string",  
    ...  
}]1
```

1 [ ] indicates that multiple records may be returned

# Query API Error Response

- Outputs: Error data will be returned in Json format:

```
{  
  "fault": {  
    "faultstring": "string",  
    "detail": {  
      "errorcode": "string"  
    }  
  }  
}
```

# Supply Point Enquiry API

- Input
- outputs
- Error Codes

# Supply Point Enquiry API Inputs

- Input *query parameters* (at least one input query parameter must be provide)

See Query API Specification (above)

#	Name	Type	Length	Description
1	mprn	string	50	Meter Point Reference Number (MRPN). A unique identifier for the point at which a meter is, has been or will be connected to the Gas Network.
2	address_id	string	30	Internal ID that links MPRN to address data (internal use only)
3	postcode	string	10	Post Code

- Optional address parameters where postcode provided

See Query API Specification (above)

#	Name	Type	Length	Description
3.1	house_no	string	10	House Number
3.2	sub_building_name	string	40	Sub Building Name
3.3	Street	string	40	Street
3.4	Town	string	40	Town
3.5	County	string	3	County
3.6	Country	string	3	Country
3.7	dependent_street	string	40	Dependent Street
3.8	dependent_local	string	40	Dependent Locality

# Supply Point Enquiry API Outputs

- Output

Enquiry API Output Json.txt

```
{  
  "supplier": {  
    "amr_indicator": "",  
    "amr_sp": "",

}
```

# Supply Point Enquiry API Error Codes

HTTP Code	Error Code	Fault String
400	-	-
500	steps.regexprotection.ThreatDetected	Regular expression threat is detected in the API request, please check the data entered.
401	steps.oauth.v2.FailedToResolveAPIKey	Application Key sent in API request is either empty or invalid.
500	policies.custom.config.1	Application creation process has not completed due to technical issues, please contact or raise a fault with the system administrator.
500	policies.custom.config.2	Application creation process has not completed due to technical issues, please contact or raise a fault with the system administrator.
500	policies.custom.config.3	Application creation process has not completed due to technical issues, please contact or raise a fault with the system administrator.
500	policies.ratelimit.SpikeArrestViolation	Number of API requests for [product] has exceeded the allowed spike limit of [__] per [minute].
500	policies.ratelimit.QuotaViolation	Number of API requests for [product] has exceeded the allowed quota limit of [__] per month.
400	e001	Request cannot be empty, please submit at least one unique identifier.
200	e002	Requested address has twin stream meter device. You are not authorised to view this data.

# Supply Point Enquiry API Error Codes (continued)

HTTP Code	Error Code	Fault String
200	e003	Requested address has shared supply meter device. You are not authorised to view this data.
200	e004	Requested address has twin stream and shared supply meter device. You are not authorized to view this data.
200	e005	Requested address has extinct meter point status. You are not authorised to view this data.
200	e007	Requested meter reference number is not found.
200	e008	Requested meter reference number has more than one matching records; data can only be provided for unique match.
200	e009	Submitted address details has multiple records; data is only provided for unique number.
500	e010	Unexpected error occurred while processing request
200	e011	Requested address has no matching record. This may be because, there is no gas meter at this property (or) full postcode with a space is not entered (or) the entered details are incorrect.

# Transportation Rates API

## Inputs

- Input *query parameters*

#	Name	Type	Length	Description
1	Organisation Identifier	Number	10	A reference which uniquely identifies a System User / Organisation
2	Meter Point Reference Number	Number	10	A unique identifier for the point at which a meter is, has been or will be connected to the gas network.
3	Requested DM SOQ	Number	10	The requested peak daily supply offtake quantity (SOQ) of a Supply Meter Point
4	Requested DM SHQ	Number	10	The requested peak hourly supply offtake quantity (SHQ) of a Supply Meter Point.
5	MRF Type Code	Text	1	A code identifying a valid meter reading frequency.
6	CSEP Information	Text	1	Completed when additional CSEP information is required.
7	Supply Meter Point Class	Number	1	This value denotes the requested class type for the Supply Meter Point.
8	Meter Read Batch Frequency	Text	1	The frequency at which batches of reads will be submitted
9	Seasonal LSP Indicator	Text	1	Indicates whether the Supply Meter Point is a Seasonal LSP.
10	Seasonal LSP Period Start Month	Number	2	The first month in a year that offtake is permissible at the Seasonal LSP

# Transportation Rates API

## Inputs (cont.)

- Input *query parameters*

#	Name	Type	Length	Description
11	Seasonal LSP Period End Month	Number	2	The last month in a year that offtake is permissible at the Seasonal LSP.
12	Postcode	Text	10	Standard PAF postcodes as defined in the PAF digest.
13	LDZ Optional Rate Applicable	Text	1	Request for LDZ Optional Rate charge.
14	Specified Exit Point	Text	10	The Eligible Exit Point (SMP) requesting LDZ Optional Rate to be applied to/Removed
15	Grid Reference Entry Point	Text	9	Grid reference for calculation of distance. Where a different Grid Reference Entry Point is to be considered by the Transporter from the original Grid Reference Entry Point provided.
16	Grid Reference Exit Point	Text	9	Grid reference for calculation of distance. Where a different Grid Reference Exit Point is to be considered by the Transporter from the original Grid Reference Exit Point provided.

- Output

# API Specifications Document

- Full details of the API specification will be defined in a single document and available through the UK Link Documents SharePoint Site along side the CSSC file formats.

# API Principles

- Where a shipper has registered for the API service we do not expect shipper to submit these requests via a standard file over the IX.
- In the event that this does happen we recommend that these files are rejected and not processed due to different process timelines being followed.

# **Xoserve Code of Connections Document**

# Xoserve APIs Code of Connections (CoCo)

Generalised CoCo covers all (Cloud based) APIs (including SwitchStream Option 3) – Drafted – In review.

Core content describes the mechanisms and controls for gaining access to and using the Xoserve Cloud APIs.

Details connection mechanisms, authentication and authorization and how to use them including examples.

Calls out need for Developer Portal to be a robust resource to enable our partners to gain the knowledge they need to utilise Xoserve published APIs and to configure and maintain access to them.

Lays out requirements on API consumers which must be met in order to use the APIs and maintain compliance with Xoserve API access standards.

# Meter Reads Update

# xserve

## UNC Update

# Shared Supply Meter Points

# Recommend Approached for SSMPs

- We are continuing to work on the assumption that Shared Supply Meter Points are out of scope of the new CSS switching process.
- We are recommending to Ofgem that switching will continue to be managed by Xoserve via the current process.
- Where a site is shared the meter point details will not be provided to CSS until the point that a supplier wants to register the site as a non-shared site.
- Where shippers wish to register a non-shared site as shared we will liaise with the relevant parties to remove the meter point from their system and de-active the current supplier registration.
- Once the process has been approved by Ofgem we will share the lower level process details with you.

# CSO and Supplier License Exempt Sites

# CSO and Supplier License Exempt Sites

- **Connected System Operator (CSO) Sites**
  - Switching for these sites will be managed by CSS until connected to the NTS network.
- **Supplier Exempt Sites**
  - We are awaiting confirmation from Ofgem on how these will be managed.

# Update CR for ECO Process

# ECO Process

- XRN5070 - Amendment to Isolation Flag has been raised and approved by Change Managers, as a result the proposed Switching Programme CR is no longer planned to be raised.
- This change will result in all new meter points being created with a Dormant RMP Status which will enable Suppliers to deactivate the current registration where no meter has been installed.

# **Change of Market Sector Code Notifications**

# Market Sector Code Changes

- As part of Switching Programme CR-D007 - ABACUS Corrections and Re-alignments it has now been confirmed that CSS will be providing the registered Shipper with changes to the Domestic Indicator.
- As discussed in previous our previous DSG meetings it is now proposed that we update our consequential design to no longer send the MSO file to shippers for CSS sites as this is being fully managed by CSS.

# Data Cleansing Update

# xserve

**AOB**
