Benefits and Justification

Benefit Description:	XRN 5949 supports provision of an additional Priority Consumer category (D) assisting in SMPs being assigned an appropriate value in which to be assessed against when a Gas Emergency is experienced.

	XRN 6056 enables DNs and IGTs to more accurately record the physical status of the service pipe, this links to their license obligations and is a current focus of Ofgem and the HSE. XRN 6079 outlines the parameters by which EMR data is to be maintained in Central Systems, it also determines the circumstances emergency contact details provided for Larger Supply Points can be recorded and retained by Central Systems, and it also ensures no differentiation between the treatment of EMR data for Large Firm Supply Point & Interruptible Supply Points. XRN 6122 supports ongoing compliance with GDPR and the UNC.
	What, if any, are the tangible benefits of introducing this change? What, if any, are the intangible benefits of introducing this change?
Benefit Realisation:	XRN 5949 - With the introduction of the new Priority Consumer into the Central Systems to feed downstream reporting/processes. XRN 6056 - Upon cleansing of the existing data, and as of the first engineer visit post deployment. XRN 6079 - As soon as the change is implemented. No transitional rules are anticipated. XRN 6122 - As soon as the change is implemented.
	When are the benefits of the change likely to be realised?
Benefit Dependencies:	XRN 5949 - Industry processes being updated to reflect the new Priority Consumer category. XRN 6056 - Confirmation of the charging tables and the cleansing of the existing data. XRN 6079 - Shipper submission of EMR data in accordance with the parameters outlined in UNC post 0926S implementation. XRN 6122 - Dependency on the functionality delivered by XRN6079 relating to the identification of 'Mandatory' data

	Please detail any dependencies that would be outside the scope of the change, this could be reliance on another delivery, reliance on some other event that the projects has not got direct control of.

Service Lines and Funding

Service Line(s) Impacted - New or existing:	XRNs 5949 & 6056 sit under Service Area 3: Manage Updates to Customer Portfolio, the proposers initial view is that a funding split as per Service Area 3 is appropriate for XRN 6079, however, as IGTs and NGT are also impacted parties, further discussion at DSC ChMC on this split may be beneficial. XRN 6122 sits under DS-CS-SA3-16, which covers the recording and provision of EMR data.
