Gemini Enhancements November 25

Overview

The below table provides more details of the minor changes to be made to the Gemini Platform on the **05 November 25**. They do not have any functional impacts to customers and are, in the main, updates to the User Interface.

Screen Name	Location Path	Change Type	Change Description
Renominations	Renominations	UI Standardisation	Hover over feature issue resolved
Unique Site Energy	Measurements > Unique Site Energy	UI Standardisation	Values for zero (0) has been removed
Adjustment Screen	Allocations>Post Closeout Adjustments>Post Closeout Energy Adjustment	Screen Enhancement & Defect Fixes	1. Meter Type Field, drop down values sorted to be in Alphabetical order. 2. For Interconnector Output Meter type, in Template download, Meter ID Field added. 3. Error Code column field, it should be only Error Code field title change. 4. Submit button with selected invalid file type, - amendment to validation message. 5. Submit button to upload file issue resolved.
Setup Product Info - IP MoS	Product>Product Info > Setup Product Info - IP MoS	New Screen	New screen made available for view only (fields will be greyed out)
Raise request Screen	Raise request	Screen Enhancement	Merged name data field added to aid ticket information capture

If you have any questions related to any of the above enhancements, please contact the Gemini Team on geminiengagement@correla.com
