	Business Owner:		
Change Status:	☒ Proposal	☐ With DSG	☐ Out for Review
	☐ Voting	☐ Approved	☐ Rejected

Impacted Parties

Change Reference:	☐ Shipper	☒ Distribution Network Operator
	☐ NG Transmission	☒ IGT
	☐ All	☒ Other <Xoserve>

Justification for Customer Class(es) selection:	Changes in scope for the release include those impacting the above parties

Proposer Requirements / Final (redlined) Change

Problem Statement:	The request for this Change Proposal is to ensure that there is visibility to ChMC of the change within scope of this release and progress of Minor Release Drop 15.
Change Description:	This change proposal has been raised to create a parent XRN for the Minor Release Drop 15 There are 2 changes within this release: | 5732	Inclusion of IGTs in Specified Processes
5890	Proactive reporting of MAP ID	
Proposed Release:	Minor Release Drop 15 – Go Live 5th December 2025.
Proposed Consultation Period:	☒ 10 Working Days ☐ 15 Working Days ☐ 20 Working Days ☐ Other [specify here]

Benefits and Justification

Benefit Description:	The main benefit for XRN5732 is that the UKLink system will be able to accept requests for the MUS & GSR functionalities from CMS once prepared. IGTs will be able to use the same processes as GTs for MUS & GSR functionality once the relevant CMS drop is implemented. For XRN5890 the main benefit is that this change will enable better visibility of MAM and Shipper RGMA data to the CDSP. The report will be provided to Meter Asset Providers (MAPs) so they

|	
	can evaluate performance and/or make recommendations for improvements to ReCCo.
	What, if any, are the tangible benefits of introducing this change? What, if any, are the intangible benefits of introducing this change?
Benefit Realisation:	The benefits for XRN5890 are expected to be realised upon implementation and delivery of the first report. The benefits for XRN5732 will be seen post CMS implementation of this change.
	When are the benefits of the change likely to be realised?
Benefit Dependencies:	The CMS aspect of XRN5732 is required to be delivered to enable the process to be utilised by IGT's to see the benefits.
	Please detail any dependencies that would be outside the scope of the change, this could be reliance on another delivery, reliance on some other event that the projects has not got direct control of.
